

Penalty Shoot-Out Simulator now with outdoor Event Station

Goal Striker is the world's most advanced interactive penalty shootout experience. State of the art technology determines and records the velocity of the ball and the exact position at which it crosses the goal line.

A virtual Goalkeeper has the ability to save each penalty, onscreen commentary and crowd noise are incorporated to add pressure and create a real shootout experience.

Each player has 3 or 5 penalty attempts, each shot is then electronically analysed and points awarded, the results immediately appear on the projected backdrop informing the player and the audience how fast and how accurate the shot was, but watch out for the projected goalkeeper whose movements are calculated and based on the reactions of professional goalkeepers in the European soccer leagues! The best 3 shots make up the player's overall score and these results are printed on a certificate that shows exactly how they did and where they placed the ball.

Clients have the opportunity to brand the Penalty Shootout experience to suit their individual requirements including the Advertising hoardings, Certificates and Tent structure

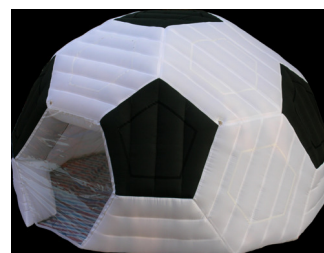

Operational Space Requirements 5.5m x 8.2m x 3.1m High

Build Footprint 7.5m x 11m x 3.3m High

Now Available for Outdoor Events

Incorporating the Football Event Station

Operational Space Requirements 12m x 12m x 6m High
